Ms. Dawn Casteel
State of California
Department of Health Services
Hazardous Materials Management Section
744 P Street
Sacramento, California 95814

RE: Dept of Health Services ltr of 29 Nov 1979

Dear Ms. Casteel:

In response to the above referenced letter and your request during our telephone conversation on 19 December 1979, I am enclosing a copy of the form which the Navy will be going to conduct Hazardous Waste Inventories at all naval activities.

Further, as explained during our telephone discussion, it is proposed to combine the efforts required to complete the Hazardous Waste Inventories and the State's survey to locate abandoned and inactive chemical wastes disposal sites. This is considered appropriate to minimize the impact on the workload of the navy activity personnel and to ensure better management and coordination of the inventories and surveys. It is believed that this will result in more complete and reliable data concerning hazardous waste generation and disposal practices.

Our approach will be to request each naval activity to complete the enclosed form plus a slightly modified version of pages (2) and (3) of your questionnaire.

Thank you for your cooperation and understanding of the advantages of coordinating your inquiries concerning Navy activity operations through this office.

Sincerely,

W. H. HATTER, LCDR, CEC, USN
Environmental Programs Officer
